Re: The City of Waxahachie
Public Water System ID TX0700008.
Grandfathering of Cryptosporidium Data.

Dear Sir;

The City of Waxahachie is aware of the requirements to meet LT2ESWTR. Parts of this rule include sampling and analysis for Cryptosporidium, E-Coli and turbidity. We are requesting "Grandfathering" of our previously collected Crypto data for the City of Waxahachie Surface Water Treatment Plant. The Cryptosporidium samples were collected by City of Waxahachie operators and were analyzed by Bio-Vir laboratories located at 685 Stone Road, Unit 6, Binicia, California 94510. This lab is accredited by National Environmental Laboratory Accreditation Conference (NELAC), and is approved by the EPA (Environmental Protection Agency) to conduct this test using EPA method 1623. There were 24 cryptosporidiosis samples collected and analyzed beginning on November 2005, and ending on November 2007. Monitoring results of this Grandfathered data will be submitted by June 1, 2008.

The City of Waxahachie will begin the process of collection and analysis of raw water samples for E-Coli and turbidity from Lake Waxahachie beginning in January 2008. These samples will be collected and analyzed by Environmental Monitoring Laboratory in Hillsboro, Texas on the second Tuesday of each month beginning January 2008 and ending January 2010.

Turbidity will be analyzed by the City of Waxahachie plant operations staff in accordance with Standard Methods 2130B.

If you have questions or need additional information, please contact me at (972) 937-7330 ext 121 or email at dbailey@waxahachie.com.

Sincerely,

David R. Bailey
City of Waxahachie
Director of Utilities
